Professionals agree, CertainTeed still leads the Vinyl and Polymer Siding industry

For the 18th year in a row, builders and contractors named CertainTeed Vinyl Siding Number One in the categories: Brand Familiarity; Brands Used in the Past Two Years; Brands Used Most and Highest Quality Brand in the 2014 Builder magazine Brand Use Study. For the 9th year straight CertainTeed CedarBoards™ has been ranked Number One in all categories surveyed for Insulated Siding. Consistently, CertainTeed has emerged the industry leader.

Icon Guide

Below you will find an explanation of each icon used for easy reference to identify and compare the many product features, benefits and specifications of the siding products offered by CertainTeed.

Panel Thickness:
Defines the average thickness or gauge of a siding panel which is an important element of siding quality. Thicker panels look straighter on the wall, are more durable, and hold up against impacts and high winds. CertainTeed siding products are regularly audited by Architectural Testing, Inc. to ensure they meet or exceed ASTM standards for vinyl siding.

Profiles:
Lists the number of different profiles available within each product line. A profile is the contour or outline of a siding panel as viewed from the side or end. Product profiles, such as clapboard and dutchlap, are designed to mimic the different architectural styles of wood cladding products.

Colors:
Shows the number of different colors available within each product line. The CertainTeed Siding Collection features solid colors that replicate the look of freshly painted cedar and variegated blends which provide the appearance of semi-transparent stained finish.

Wind Load:
This is the rating for the maximum wind pressure that a siding product can withstand. All CertainTeed Siding products are rigorously tested by Architectural Testing Inc. to meet or exceed ASTM standards for resistance to negative wind load pressures.

Colors shown throughout this brochure are as accurate as printing methods will permit. Please see product samples before making final selection.

Nail Hem Design:
Identifies the type of nail hem design on a siding product. Rollovers and / or reinforcing ribs are used to stiffen the nail hem of a siding panel, giving it a straighter appearance on the wall while contributing to the wind load resistance of the product.

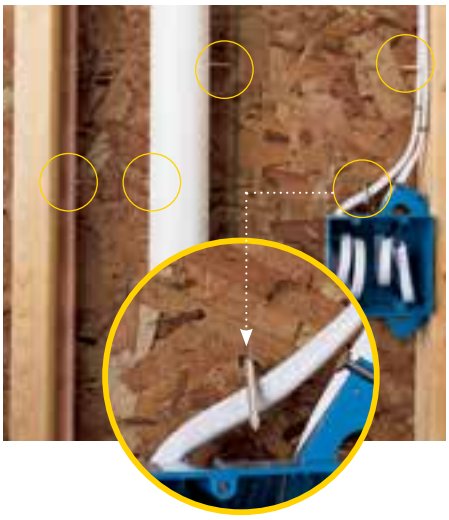
Panel Projection:
Identifies the full depth of a siding panel as measured from the back of the panel to the tip of the front of the panel. Deeper panel projections add rigidity to siding products while providing wider shadow lines that enhance aesthetics. This measurement is also used for proper sizing of accessories necessary to install the siding.

Texture:
Indicates available textures within each product line. Whether you are seeking the smooth appearance of milled cedar, or one of the many TrueTexture™ woodgrains molded from real cedar boards, CertainTeed offers a wide array of architecturally authentic product textures to choose from.

Lock:
Designates the panel lock design of the product. CertainTeed Siding Products feature proprietary locking designs created to optimize the alignment and installation for each specific product. The special features of CertiLock™ and DuraLock® ensure that every siding panel goes on the wall straight and secure.

Warranty:
All CertainTeed Siding Collection products are covered by a Lifetime Limited Warranty, backed by an industry leader and trusted brand for over 110 years.

Fastener Indicator:
CertainTeed is the only siding engineered to include an integral fastener placement guide on each panel. The Patented STUDfinder™ Installation System and Cedar Impressions® fastener indicators are designed to help ensure a safe, precise installation for maximum siding performance.



Precise fastener installation using the STUDfinder Installation System contributes to wind load performance, and helps avoid nailing into anything located between the studs, like plumbing or wiring, that could create a number of dangers.

Flame Spread Rating:
Indicates products that are Class A Flame Spread Classified, meaning that the material is highly resistant to fire and does not spread flames quickly and/or is self-extinguishing.

Fade Protection:
CertainTeed offers an industry-leading spectrum of colors including unique, darker shades and semi-transparent stained blends for virtually unlimited design possibilities. Utilizing the unique PermaColor™ System – a blend of our own Certavin™ resin, superior micro-ingredients and state-of-the-art pigment chemistry – CertainTeed guarantees Lifetime Fade Protection on our vinyl siding.

Extended Lengths:
Indicates products that are available in extended lengths, including 16', 20' and 25'. Longer length siding significantly reduces the number of seams when panels overlap horizontally, increasing the overall aesthetics of the wall.

Low Maintenance:
Vinyl siding, insulated siding, and polymer siding products are some of the lowest maintenance exterior cladding products available. Unlike other cladding products that require regular repainting, recaulking, tuckpointing, and sealing to maintain their aesthetics, CertainTeed siding products can be kept beautiful using a soft bristle brush and a bucket of soapy water.

Life Cycle Leadership
CertainTeed believes a product's environmental performance should not be a mystery. CertainTeed is the first siding producer to submit their Life Cycle Analysis data to be reviewed, approved, and implemented by the National Institute of Standards and Technology (NIST).

NIST National Institute of Standards and Technology U.S. Department of Commerce

The Building for Economic and Environmental Sustainability (BEES) on-line product evaluation program allows remodelers, builders, architects, and homeowners to evaluate any building product's environmental performance. For more information, go to www.certainteed.com/LCA.

Home Innovation NGBS GREEN PARTNER℠

This NGBS Research Labs Green Approved mark is your assurance that a product is eligible for points toward National Green Building Certification.

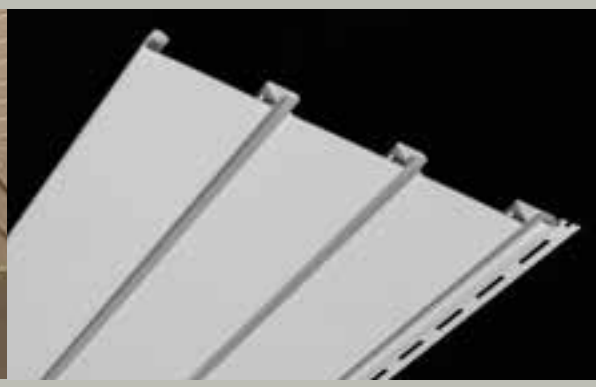
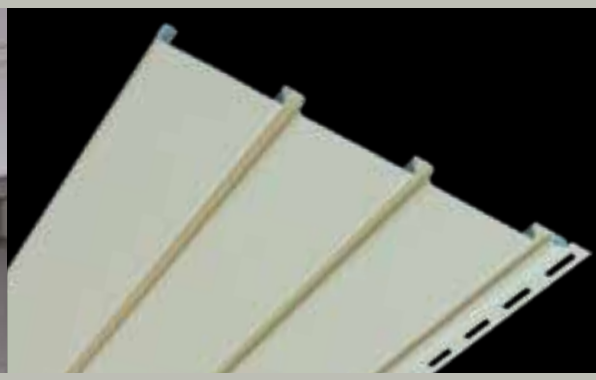
Triple 3-1/3"
Soffit & Vertical Siding

- InvisiVent® and solid styles.
- The only vinyl soffit to provide more than 10 inches of net-free intake area.
- Concealed intake vents provide a smooth appearance.
- Matte finish looks like freshly painted wood.
- Deep 3/4" panel projection creates sharp definition.
- 13 low-gloss colors.
- Heavy-duty .044" thickness for rigidity.



Perimeter™ Triple 3-1/3"
Soffit & Vertical Siding

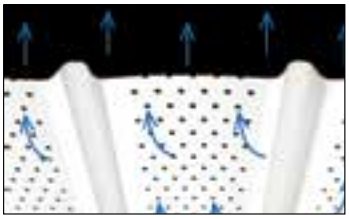
- Solid and hidden vent styles.
- 14 low-gloss colors.
- .040" thickness.
- Hidden vent style provides up to 9.65"of net-free intake area.



Beaded Triple 2"
Soffit & Vertical Siding

- Wainscot style in solid and invisibly vented.
- Designed for vertical siding, porch ceiling and soffit applications.
- Smooth finish of professionally applied paint.
- Extra-long slip-lock design helps provide secure installation.
- 8 low-gloss colors.
- .039" thickness.
- 1.6"of net-free air per sq. ft.- invisibly vented.

Triple 3-1/3" InvisiVent



Standard vented soffit

Hidden vents provide a smooth, flat non-perforated surface versus most vented soffits with unsightly perforations.

Triple 3-1/3" InvisiVent offers at least 50% more ventilation than most standard vinyl soffit, providing more than 10" of net-free intake area. This means that not only will InvisiVent provide a balanced ventilation system, but will do so with an overhang as short as 10".

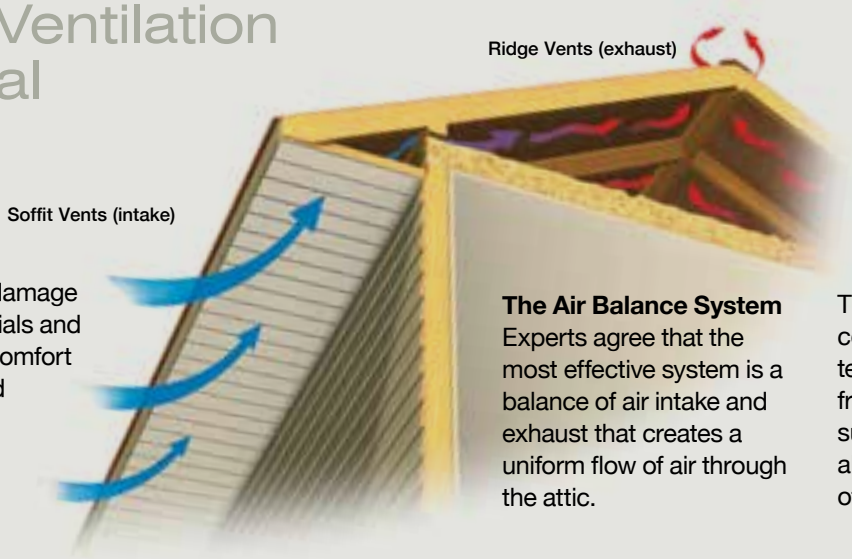
Proper Ventilation is Critical



Protection against damage to the roofing materials and structure increase comfort inside the home and energy savings.

The Air Balance System
Experts agree that the most effective system is a balance of air intake and exhaust that creates a uniform flow of air through the attic.

This system creates a condition in which the roof temperature is equalized from top to bottom, supplying a uniform air flow along the entire underside of the roof deck.

Beaded Triple 2" in colonial white.

Beaded Triple 2" in natural clay.

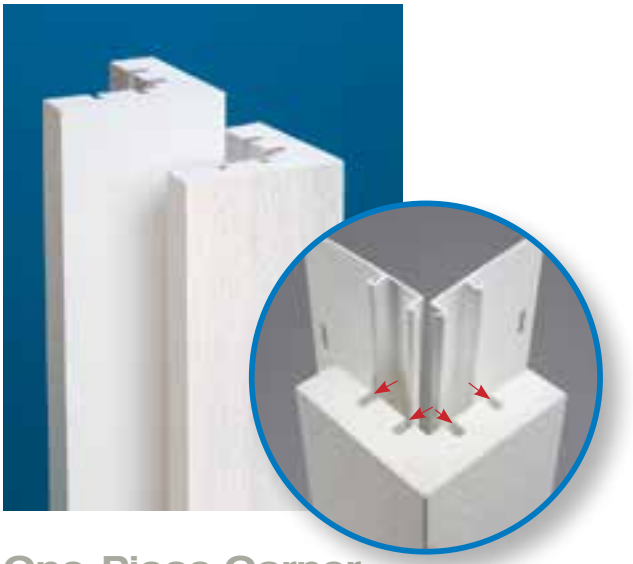
- Can be painted* to complement with exterior colors.
- Cuts and mills with traditional woodworking tools.
- Class A (Class 1) Flame Spread Classification.
- Meets ICC and CCMC code requirements.
- Made in U.S.A.
- GreenCircle Certified - contains recycled content.
- 25-year limited warranty.

*See Installation Guidelines RM003 for painting instructions.

INhanced™ TRIM LINE

INspired designs that enhance aesthetics. INnovative engineering that improves performance. INtegral components that speed installation. This collection of decorative components delivers extraordinary advantages from the inside out. Hidden flanges, built-in J-pockets, pre-assembled column wraps and one-piece corners enable easy installation, while authentic finishes create in an incredible natural wood appearance.

Look for the IN to identify CertainTeed's INhanced products.



One-Piece Corner and Nail Hem Flange

Corners are now designed to be installed with or without a nailing flange. As part of the InvisiPro™ Hidden Fastening System, a nailing flange is a quick and easy way of securing corners – avoiding any face nailing of the corner.

- Hidden attachment points.
- Secures tightly to wall with screws.
- Installs before siding.
- Corners can still be used without flange.

InvisiPro™ Hidden Fastening System

Trimboards feature grooved millwork that precision-fits to flanges secured directly to the wall, working together with both nail hem flange and starter flange for a secure fit. The flanges are concealed, leaving only a face nail-free installation with no nail holes to fill.

Column Wraps

Slides On, Swings Closed for Fast, Easy Installation

A three-sided wrap with a swinging door on the fourth side, Column Wraps are pre-cut, pre-mitered, and pre-assembled to slide around existing wood load-bearing 4 in. x 4 in. or 6 in. x 6 in. porch posts.

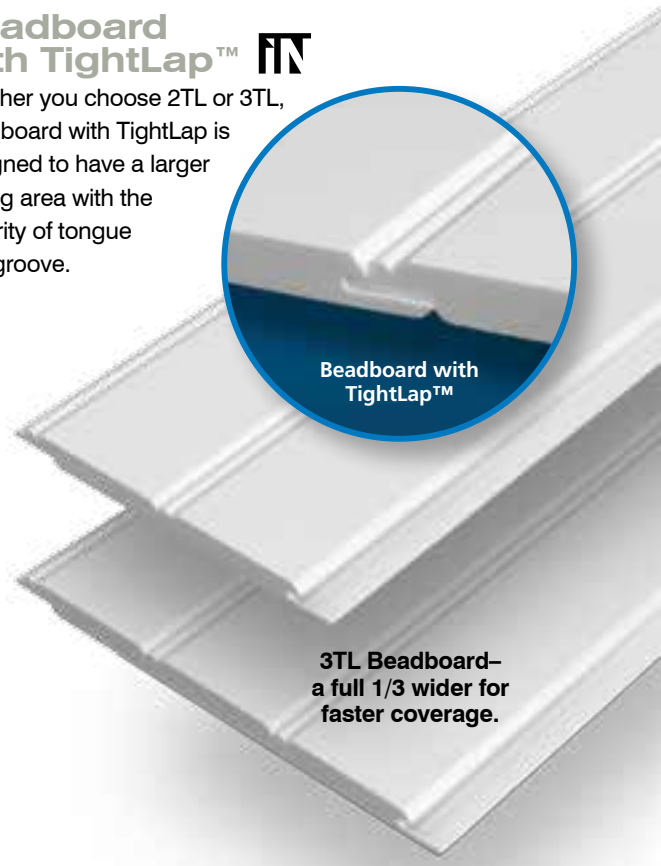
Simple and versatile, with 2 column sizes: 8 in. x 8 in. and 10 in. x 10 in. square.

Estate cap/base

Classic cap/base

Beadboard with TightLap™

Whether you choose 2TL or 3TL, Beadboard with TightLap is designed to have a larger nailing area with the security of tongue and groove.



3TL Beadboard– a full 1/3 wider for faster coverage.

J-Pockets and Cut-Outs

Restoration Millwork trimboards with built-in J-pocket eases installation of corner trim and the cut-out allows the trimboard to lie flush with the siding around windows and doors with built-in nail flanges.

New Product

Fascia Trimboard

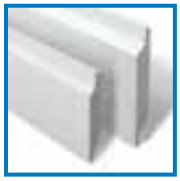
Fascia trimboard with built-in return leg is designed to work with a wide range of soffit materials. Available in TrueTexture™ and smooth finish.

Sheets

Available in a full selection of custom and standard sizes and shapes, sheets can be used to create distinctive, one-of-a-kind exterior elements that are as beautiful as they are durable.

CustomCraft™

Restoration Millwork CustomCraft boards and sheets for custom fabrication feature extra thickness, so they reduce time and labor costs related to laminating and creating custom designs. CustomCraft Sheets are available in 1-½ in. x 4 ft. x 8 ft.



Skirtboard with DualStart® Design

Engineered with DualStart® Design (patent-pending) cuts installation time while providing the 6 in. ground clearance required by U.S. building codes for fiber cement siding.

UnderShield®
Water Diversion System

UnderShield® turns an unsightly deck underside into a dry, beautiful ceiling, creating limitless options for new exterior living spaces.

New Possibilities for the Home

A beautiful deck is easy to love, from the top. Now, you can love your deck from underneath as well, with the beautiful possibilities of UnderShield.

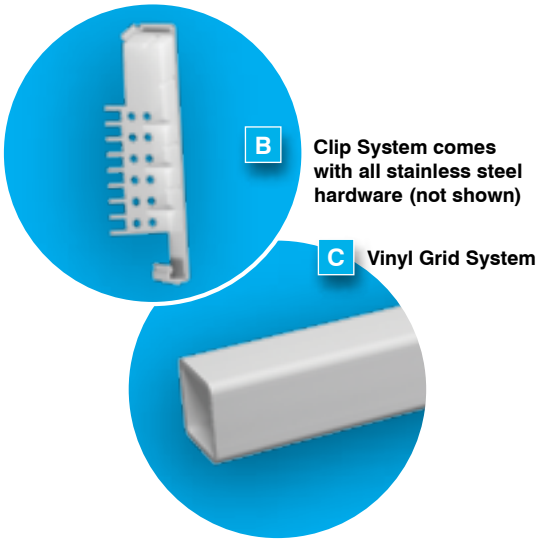
A unique, vinyl shield and ceiling system designed to respond to the needs of building professionals and homeowners, UnderShield is easy to install to new or existing decks, and will maintain unobstructed air flow when properly installed. Panels can run parallel or perpendicular to the home, and an easy-to-use clip creates the desired pitch.

- Low maintenance water diversion system.
- Easy to install adjustable grid system.
- Concealed clip system.
- Stainless steel hardware provides security and lasting performance.
- High quality vinyl panels available in 6"x 16'.
- Choice of 2 panel styles and 3 colors.
- Suitable for one and two-story residential applications.
- Installs under the deck joist - no need to worry if the framing is 12" or 16" on center.
- Helps maintain the required ventilation under the deck for most composite deck boards.
- Since it installs under the framing, there is no need to worry about any bracing that may have been installed between joists.
- Class A Flame Spread rating.
- Lifetime limited warranty.

Savannah Wicker

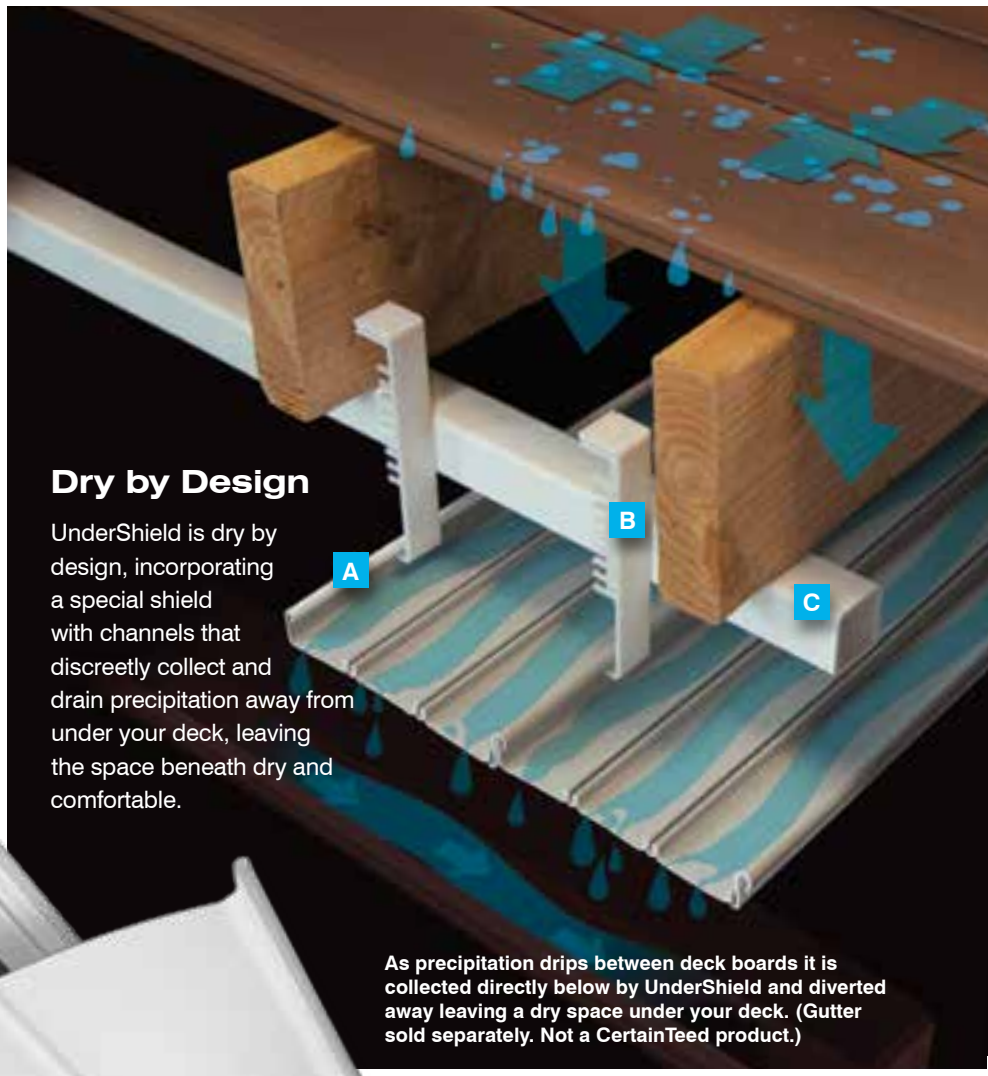
Sterling Gray

Colonial White



Clip System comes with all stainless steel hardware (not shown)

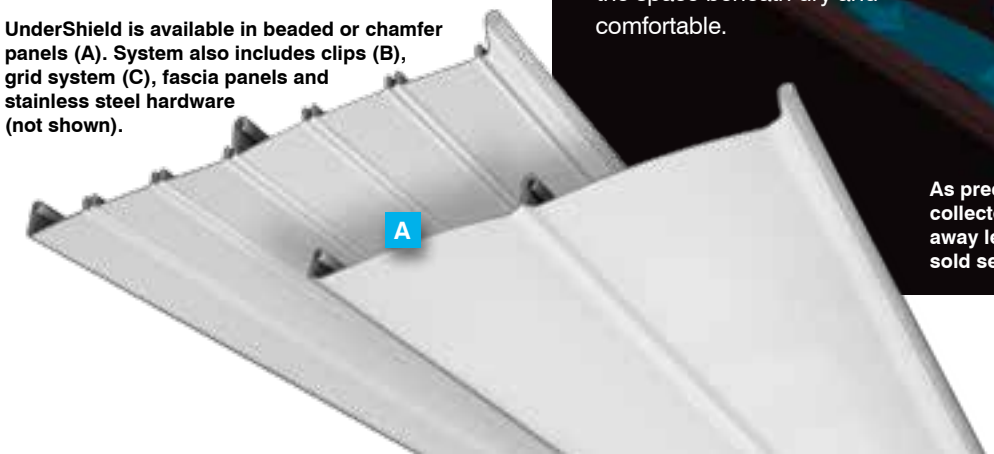
Vinyl Grid System



Dry by Design

UnderShield is dry by design, incorporating a special shield with channels that discreetly collect and drain precipitation away from under your deck, leaving the space beneath dry and comfortable.

As precipitation drips between deck boards it is collected directly below by UnderShield and diverted away leaving a dry space under your deck. (Gutter sold separately. Not a CertainTeed product.)



UnderShield is available in beaded or chamfer panels (A). System also includes clips (B), grid system (C), fascia panels and stainless steel hardware (not shown).

CertaWrap™
Weather Resistant Barrier

CertaWrap Accessories

For maximum effectiveness, it's critical to finish your CertaWrap installation with tight sealing methods. CertaWrap accessories offer everything needed to get the job done right. Use them to seal window and door openings, cracks, seams and penetrations prior to applying exterior cladding.

CertaFlash™ BA

available in 4" x 75', 6" x 75' and 9" x 75'

CertaFlash™ Flex

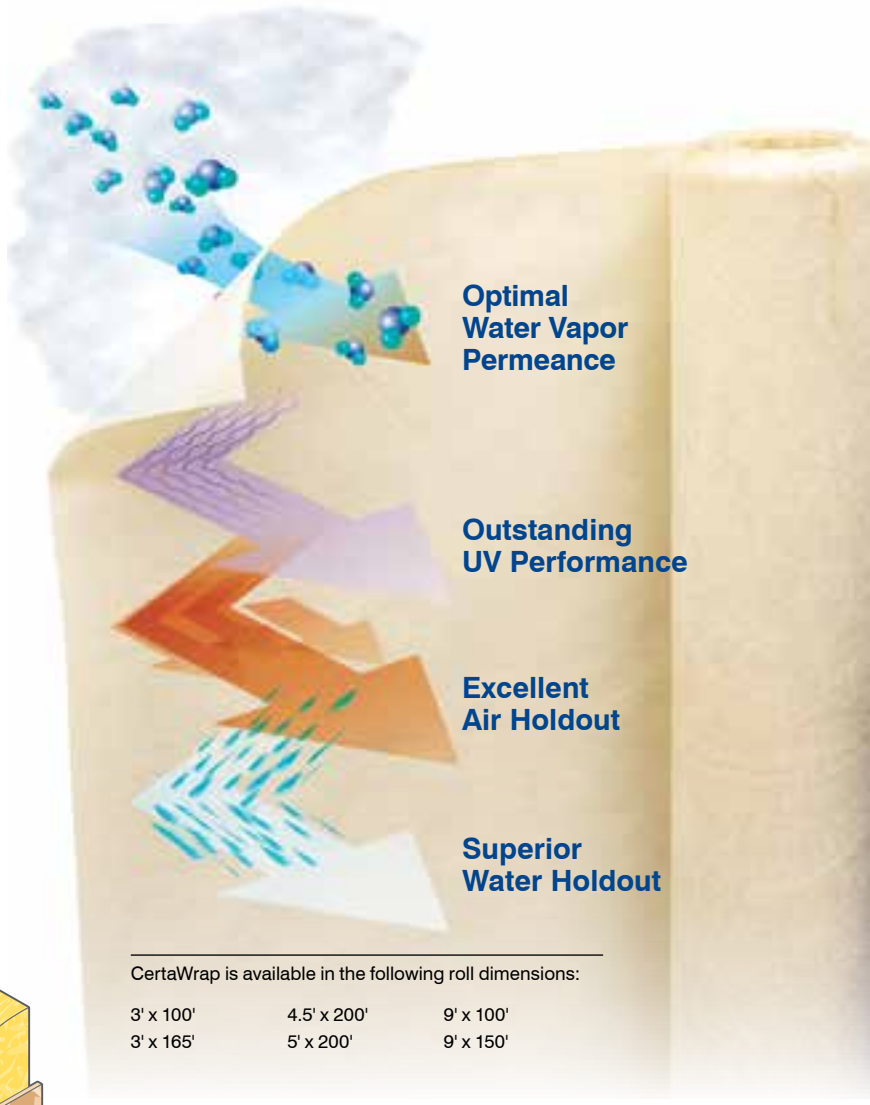
available in 6" x 75' and 9" x 75'

CertaTape™

available in 1-7/8" x 165'

CertaWrap Weather Resistant Barrier provides an added layer of protection against air and moisture damage. It's part of the complete CertaWall Weather Deterrence System™.

- The best defense against mold, mildew and water damage.
- Superior air holdout for better energy efficiency.
- Optimal Permeance Rating of 11.7.
- Outstanding UV performance.
- Excellent surfactant resistance.
- Double-strength tear resistance.
- Easy handling and installation with STUDfinder™.
- Class 1(A) fire rating
- Lifetime limited warranty.
- Available co-branded with your logo! NEW



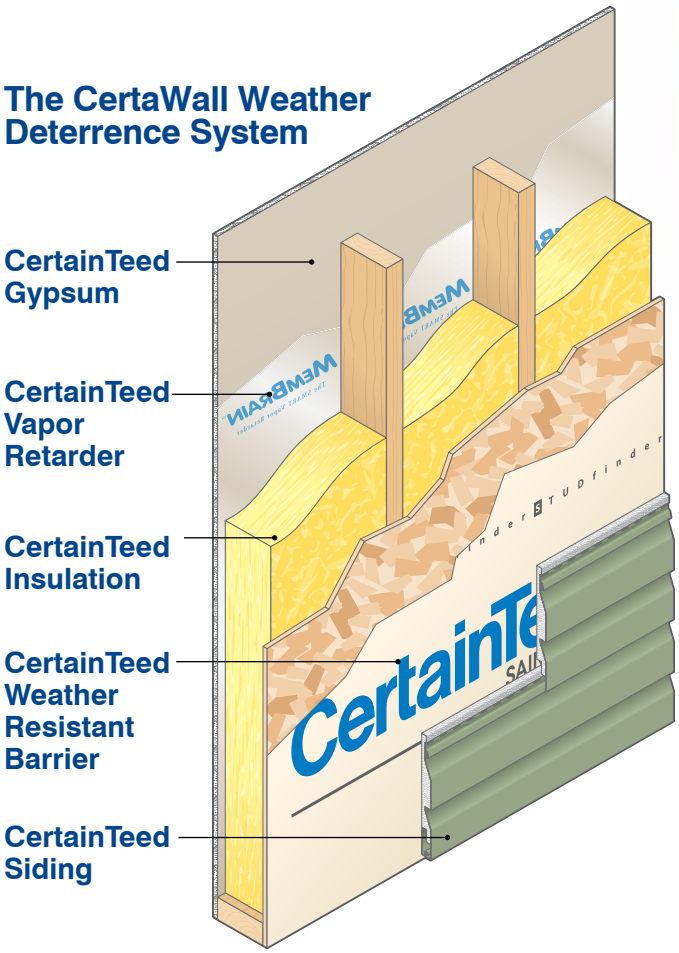
CertaWrap is available in the following roll dimensions:

3' x 100'	4.5' x 200'	9' x 100'
3' x 165'	5' x 200'	9' x 150'

CertaWall Technology

Beauty is more than skin deep. That's especially true when it comes to building or improving a home. Protection from the elements, energy efficiency and long-term performance are just as important as aesthetics. The CertaWall Weather Deterrence System delivers those advantages. As a key component in the system, CertaWrap Weather Resistant Barrier helps assure long-term satisfaction.

The CertaWall Weather Deterrence System

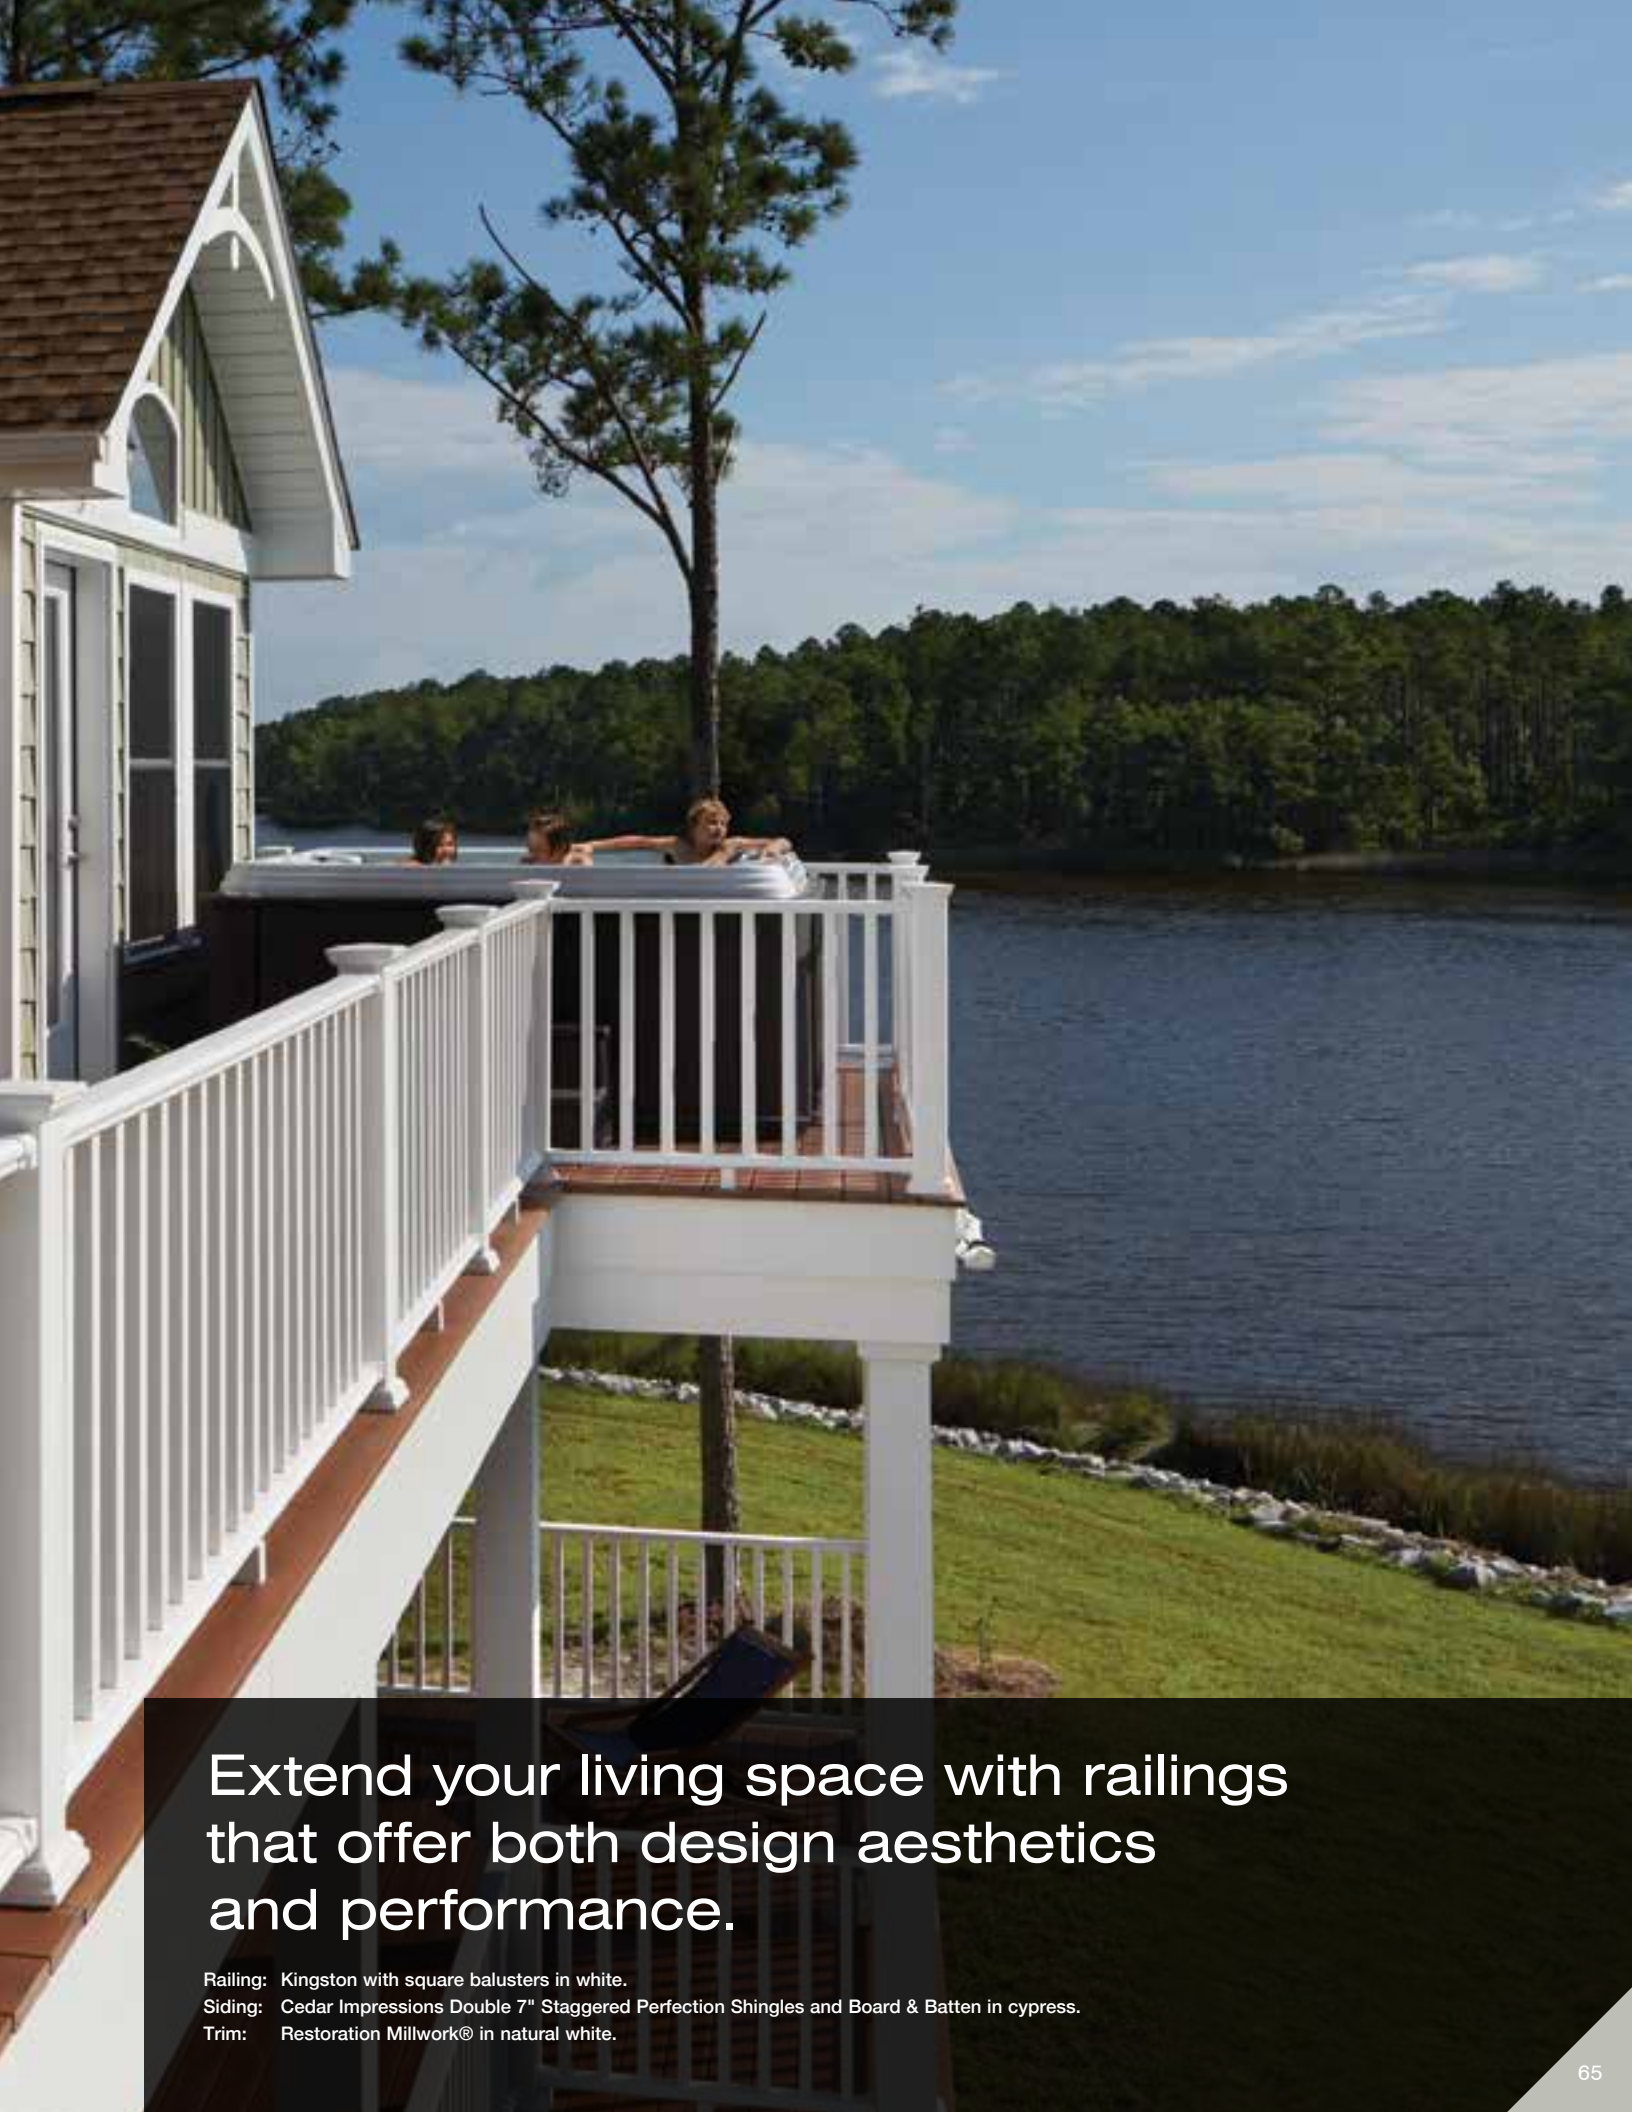


CertaWrap Performance

Superior Breathability, Water Resistance and Vapor Transmission

Mold, mildew and water damage are a home's worst enemies. An effective weather barrier system defends against these problems by resisting moisture penetration and air infiltration while allowing water vapor to dissipate. CertainTeed CertaWrap offers the industry's best combination of all of these properties, helping you defend against moisture and the elements during construction, and preventing moisture buildup – from inside and outside the home – after cladding is applied.

EverNew®
Oxford & Kingston Vinyl Railing Systems



Extend your living space with railings that offer both design aesthetics and performance.

Railing: Kingston with square balusters in white.
Siding: Cedar Impressions Double 7" Staggered Perfection Shingles and Board & Batten in cypress.
